

As an Indiana citizen on the No Call List I wish to register the strongest possible opposition to banks, or any other businesses, trying to overturn, or circumvent this right to privacy, and freedom from harrassment we have asked the state to provide us with. I pay for the privilege to have a phone, and I have the right to say who can and cannot contact me on my phone. And I'm tired of my phone bill going up to put more and more "services" on my line that are supposed to offer "protection from unwanted calls". It's all becoming one more rip off of consumers. If it's your job to protect us, then please do your job. Thank you.
